Upload to S3 Bucket

For this exercise, download and upzip <code>log_data</code> from the Resources tab in the classroom.

1. Click on the bucket you just created and select **Upload** on the top left.

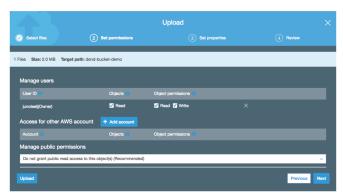

2. Select ${\bf Add\ files}$ and choose the ${f log_data.csv}$ file you downloaded from this classroom.

3. Leave the default settings and select Next.

4. Choose the **Standard** storage class and select **Next**.

5. Review your settings and select **Upload**.

6. You should be able to see details on the file you just uploaded by selecting it in your bucket.
